

Pay Statements

Create Pay Statements for Complex and Compliance-Driven Scenarios

Yes, we can do that...

- ✓ Compliance with state required access including the option of print with an EDSI print vendor integration
- ✓ Include additional information and any required employee communications
- ✓ Multiple template support and allocations
- ✓ Employee access for both current and prior pay statements
- ✓ Provide pay statement history to active and terminated employees
- ✓ File integrations with Oracle and Oracle Cloud
- ✓ French and Spanish support for your employees

How it works...

Control the Format of Your Pay Statements

With our pay statement services, you can tailor your pay statements to include the relevant information for each of your employee groups and offer pay statements in multiple languages to cater to your diverse workforce.

Universal and Continued Access for Current and Former Employees

Employees can quickly view current and past pay statements from an online portal either from a phone, desktop or tablet. Eliminate the need to give your former employees access to your core HR systems by providing access to their required pay information through an online portal.

Text Alerts and Email Notifications

Employees can be notified automatically when new pay statements are available.

Choose the Format That Meets Your Needs

For a growing number of employers, relying on the standard pay statement from your payroll provider isn't sufficient. Experian Employer Services helps payroll teams create multiple types of pay statements to meet all requirements from your organization and all states and territories. Our Pay Statement solution recognizes the unique needs of each employer, allowing for relevant information to be included for each employee group. Rather than restricting you to a single template, we work to deliver pay statements in a way that fits your organization, including the option of using our seamless portal with your own branded login page.

At Experian Employer Services, our pay statement solution offers many benefits, including our adapt-able formats for your pay statements, French/Spanish support for your employees, text and email alerts and more.

Why Work with Experian Employer Services for Pay Statements

- › **Tailored Formats:** In the globalized world we live in today, many employees aren't required to head to the office or location. With a remote workforce comes the need for different pay statement formats to comply with local jurisdictions and communicate specific information to different employee groups.
- › **Accessibility:** Gone are the days of sending pay statements through the mail. With our pay statement services, employees can easily access their pay information from an online portal on their phone, desktop or tablet, allowing them to view details on their wages, deductions and other line items on the go. Not only is accessibility improved for current employees, but you can grant pay statement access to former employees without providing access to your core HR systems to mitigate security risks.
- › **Alerts:** Boost employee satisfaction by using a pay statement service provider that keeps them updated on the latest changes to their pay information. Through our services, employees can opt for text and email alerts that notify them immediately as new pay statements are available.
